Anthony Tian

+1 (626) 677 - 0875 | tian.ruy@northeastern.edu | anthonyt.vercel.app | linkedin.com/in/anthony-tian | Boston, MA

Summary

Ambitious Data Science student experienced in creating direct business value via self-driven projects across machine learning, statistical analysis, and workflow automation. Skilled in translating data insights into actionable decisions for diverse stakeholders.

Technical Skills

Languages & Frameworks:	Python, SQL, HTML, JavaScript, Git, R
Data Science & ML:	TensorFlow, LangGraph, LangChain, PyTorch, Optuna, Scikit-learn, XGBoost, Statsmodels, Pandas, Polars, NumPy, Matplotlib, Seaborn, Altair
Cloud & Infrastructure:	GCP, Snowflake, Cursor, Docker, MongoDB, Visual Studio, GitHub, Vercel
Analytics:	Advanced Microsoft & Google Suites, Looker, Tableau, PowerBI

Experience

Klaviyo Jan 2027 – Jun 2027
Data Analyst Co-op *Boston, MA*
- Incoming Winter & Spring 2027

Wayfair Jan 2026 – Jun 2026
Data Analyst Co-op *Boston, MA*
- Engineered & deployed prediction model (conversion rate), enabling earlier budget decisions, saving $625/ad **($65k a year)**.
- Designed model resourcefully: feature engineering cross-sourced metrics & applying regularization, to limit business risk.
- Explained machine learning concepts, costs, & judgment calls to non-ML stakeholders, relevant to CVR prediction model.
- Revamped all subteams' main dashboards (GBQ/SQL → Sheets & Looker), saving **8-12 hours/month** of manual reporting.
- Integrated a Cursor agent with Google & Slack MCPs to automate ad-pause process, eliminating **$300 leakage per week**.
- Spearheaded A/B test, whose results optimized keyword audience targeting, increasing **ROAS 1.6x** via 46% CPM decrease.

Yiyang Education Jun 2025 – Jun 2026
Machine Learning Instructor *Walnut, CA*
- Distilled machine learning concepts into core, natural intuitions for 4th-6th graders via engaging lectures & visualizations.
- Connected algorithms to recognizable products through projects (i.e. Regression → GPS ETA, CNNs → facial recognition).
- Lectured on broader topics: AI supply chain, current-best specialized AI tools (i.e. slides, video), & application frameworks.

Northeastern University Jan 2024 – Jun 2026
Graduate Teaching Assistant *Boston, MA*
- Expounded economic & data concepts in practice intuitively for students of both technical and non-technical backgrounds.
- Held 14 office hours per semester, guiding students 1:1 through data sourcing, quality, interpretation, and visualization.
- Learned domains quickly, by recognizing parallel/similar components in vastly diverse topics for 19 dense, research papers.

Projects

Restaurant Reviews Analysis Dashboards (Freelance) *APIs | NLP | XGBoost*
- Built analytics dashboards for local restaurants, scraping reviews (SerpAPI), then analyzing/visualizing (Python, NLP).
- Extracted possible causes (i.e. service) from reviews (NLP) & stress-tested their statistical impacts to ratings (XGBoost).
- Translated data insights into action (i.e. complaints, pricing) for non-technical stakeholders, with justification & brevity.

Computer Vision – Boxing Form Grader *PyTorch | Scikit-learn | OpenCV*
- Built vision pipeline to count punches via pose tracking for spars, for 14 Spar Club members, across 100+ match recordings.
- Engineered features (i.e. elbow extension degree) from raw footage using CNN pose landmarks and distance calculations.
- Calibrated scoring with 200+ self-labeled reps from personal footage as training data, using percentile analysis (NumPy).

Education

Northeastern University Boston, MA
B.S. in Data Science | B.S in Business Administration (Finance Concentration) *Graduating Dec 2027*

Relevant Coursework: Applied Machine Learning, Large-Scale Information Storage/Retrieval, Modern Neural Networks, Creating Business Value with Data & AI, Information Presentation and Visualization
