Anthony Tian

(626) 677-0875 | tian.ruy@northeastern.edu | anthonyt.vercel.app | linkedin.com/in/anthony-tian | Boston, MA

Education

Northeastern University — Boston, MA

B.S. in Data Science | B.S in Business Administration (Finance Concentration) — *Graduating Dec 2027*

Relevant Coursework: Applied Machine Learning, Large-Scale Information Storage/Retrieval, Modern Neural Networks, Creating Business Value with Data & AI, Information Presentation and Visualization

Experience

Klaviyo — Jan 2027 – Jun 2027

Data Analyst Co-op — *Boston, MA*

- Incoming Spring 2027

Wayfair — Jan 2026 – Jun 2026

Data Analyst Co-op — *Boston, MA*

- Engineered & deployed prediction model (conversion rate), enabling earlier budget decisions, saving $625/ad **($65k a year)**.
- Designed model resourcefully: feature engineering cross-sourced metrics & applying regularization, to limit business risk.
- Explained machine learning concepts, costs, & judgment calls to non-ML stakeholders, relevant to CVR prediction model.
- Revamped all subteams' main dashboards (GBQ/SQL → Sheets & Looker), saving **8-12 hours/month** of manual reporting.
- Integrated a Cursor agent with Google & Slack MCPs to automate ad-pause process, eliminating **$300 leakage per week**.
- Spearheaded A/B test, whose results optimized keyword audience targeting, increasing **ROAS 1.6x** via 46% CPM decrease.

Yiyang Education — Jun 2025 – Jun 2026

Machine Learning Instructor — *Walnut, CA*

- Distilled machine learning concepts into core, natural intuitions for 4th-6th graders via engaging lectures & visualizations.
- Connected algorithms to recognizable products through projects (i.e. Regression → GPS ETA, CNNs → facial recognition).
- Lectured on broader topics: AI supply chain, current-best specialized AI tools (i.e. slides, video), & application frameworks.

Northeastern University — Jan 2024 – Jun 2026

Graduate Teaching Assistant — *Boston, MA*

- Expounded economic & data concepts in practice intuitively for students of both technical and non-technical backgrounds.
- Held 14 office hours per semester, guiding students 1:1 through data sourcing, quality, interpretation, and visualization.
- Learned domains quickly, by recognizing parallel/similar components in vastly diverse topics for 19 dense, research papers.

Research

Next Basket Purchase Prediction, Independent — Oct 2025 – Dec 2025

- Replicated Li et al. (ACM TOIS 2023) on new data, predicting online shoppers' next purchase, using 1M+ transactions.

Projects

Restaurant Reviews Analysis Dashboards (Freelance) — *APIs | NLP | XGBoost*

- Built analytics dashboards for local restaurants, scraping reviews (SerpAPI), then analyzing/visualizing (Python, NLP).
- Extracted possible causes (i.e. service) from reviews (NLP) & stress-tested their statistical impacts to ratings (XGBoost).
- Translated data insights into action (i.e. complaints, pricing) for non-technical stakeholders, with justification & brevity.

Computer Vision – Boxing Form Grader — *MediaPipe | OpenCV | Python*

- Built vision pipeline (OpenCV) to grade & count punches via pose tracking (MediaPipe, YOLO-pose) for bagwork & spars.
- Engineered visibility-gated EMA smoothing to prevent tracking failure when landmarks (limbs) are occluded mid-punch.
- Calibrated scoring with 200+ reps from personal boxing footage as training data, using percentile analysis (NumPy).

Technical Skills

Languages & Frameworks:	Python, SQL, HTML, JavaScript, Git, R
Data Science & ML:	Scikit-learn, TensorFlow, PyTorch, Optuna, Statsmodels, Pandas, Polars, NumPy, Matplotlib
Cloud & Infrastructure:	GCP, Snowflake, Cursor, Docker, Anaconda (PyCharm, Jupyter), GitHub, Vercel
Analytics:	Advanced Microsoft & Google Suites, Looker, Tableau, PowerBI
